Calf raises
- 10 Shoulders and Arms**
Shoulder flexion/abduction
- 11 Shoulders and Arms**
Shoulder rotation
- 12 Shoulders**
Range of movement
- 13 Postural Correction**
Maintaining good posture

The exercises described in this leaflet are designed to promote awareness of good posture. Each exercise helps to correct and control posture, encourages the movement of key body areas prone to becoming stiff and contributes to improved balance. If you suffer from any pre-existing conditions or experience any discomfort whilst carrying out these exercises, then please seek advice from a qualified professional (e.g. GP or physiotherapist).

Please ensure your clothing, the environment and equipment used for these exercises is appropriate for the task.

Let's Get Moving

Ankles

Ankle flex and rotation

Ankle movements

In neutral sitting position raise left leg slightly from the floor and point your foot. Flex your foot up and down, repeat 10 times.

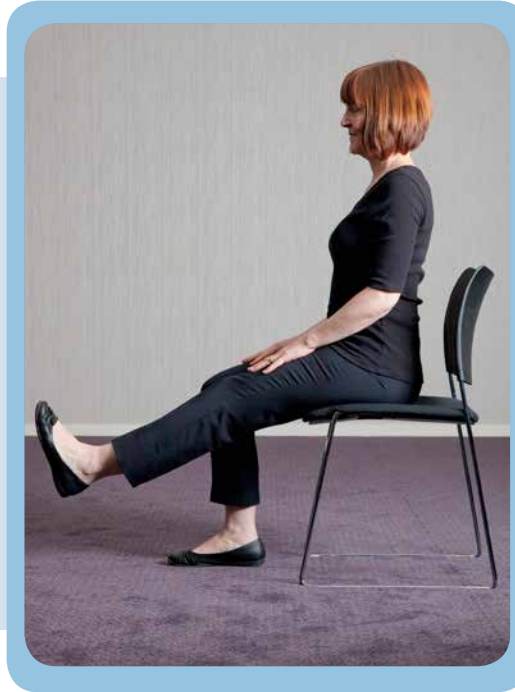

Repeat with your right foot.

To progress this movement

Circle your left foot at your ankle clockwise and anticlockwise 10 times each.

Repeat with your right foot

The Benefits for You

Maintaining or increasing your flexibility by putting your body through a full range of movements helps to keep it flexible.

Activities don't need to be structured; any kind of activity will create benefits. Consider walking instead of driving, or taking the stairs instead of the lift.

Exercise is good for your mind. It is known to, lift your self-esteem and improve your sense of worth.

***Being active will help you
